

Invitation to Attend

Localization of aid and accountability to affected population

Side Event on Brussel VI conference for supporting the future of Syria and the region

Date: 05-05-2022 // Time: 11.30-13.00 CET

Venue: the Thon Hotel EU - Room "France" (Rue de la Loi 75, 1040, Brussels)

Language: English

This round table will discuss the localization in early recovery in a very complex context like the Syrian one specifically the multi-hub response model. Will try to answer how this model can be applied without promoting and encouraging the fragmentation of the country into 4 areas of control and strengthening the economy of war.

It will raise the following questions: How can an extensive involvement of local communities through localization of aid, increase accountability to affected populations? To what extent can localization of aid bypass the influence of all actors in the different areas of control, without constituting an obstacle to early recovery and future reconstruction approaches on the national level?

To attend this in-person event, please [REGISTER HERE](#) and fill out the registration form
